SUMMARY

I am a committed and detail-oriented individual who is seeking full-time employment in a collaborative and challenging environment. I am motivated, driven and I also have knowledge in trouble-shooting and network support. Looking for an opportunity to work with a reputable organization and prove my worth.

SKILLS

React, TypeScript, Node, Express, Next v13+, MongoDB, Ruby on Rails, Tailwind

SOFTWARE PROJECTS

Social Network for Cariboux, *Full-Stack Software Developer*

- Built a map using React / Redux Toolkit to work with Socket.IO and MongoDB to listen for specific database operations. Achieved a 15% incr. in user experience as the map executes updates in Real-Time.
- Created a Real-Time Live Chat Messaging feature where each conversation is also persisted in the MongoDB Atlas database and also incorporated In-app Real-Time notifications.
- **Github**  **Website** 

Movie Bookmarker, *Full-Stack Software Developer*

- Built with Ruby on Rails to bookmark your favourite movie. Developed the user image uploading feature using Cloudinary's api resulting in Lowered the bounce rate by 7%.
- Congratulated for the superb frontend design and appointed as the delegate frontend developer resulting in a 28% incr. in peer-to-peer training of cross-functional team members.
- **Github**  **Website** 

Last Resort Marketplace, *Front-End Software Developer*

- Build the front-end and introduced animations using Ruby on Rails and Sass while also updating the product backlog and prioritizing features that align with business objectives.
- Led the frontend team to achieve project goals on time, sharing knowledge and best practices, performed Pull-Requests and resolve Merge Conflicts using Git, Github and Team Communication.
- **Github**  **Website** 

E-commerce Clothing Application, *Full-Stack Software Developer*

- Built using React, Redux, Styled-components and Aos for animations, added loading shimmers and persist data using Firebase.
- Executed Server-side validation to store valid data and refreshed the UX to accessibility standards.
- Published the app on GitHub and deployed it on Netlify.
- **Github**  **Website** 

SMALL PROJECTS

Slack Clone

- Built a slack clone in the browser using HTML, CSS (Flexbox) hosted on Github pages.

Kart Racing Game

- Built a two player kart game using HTML, CSS and JAVASCRIPT. Players are racing to the finish line using keyboard events and Dom manipulation.

COURSE WORK

Frontend Masters Courses | Meta Front-End Developer Professional Certificate | Zero To Mastery Academic Courses
